WELDER

The candidate will have the opportunity to grow professionally and train deepening their skills by being part of a team of professionals.

The type of parts we work most are:

- Energy sector rotors (from 3 to 60 tons);
- Machine structures for industry;
- Rollers (600 to 1,800 mm diameter) where we perform submerged arc cladding;
- Turbine cases and stators;
- Big constructions for civil projects;

We are looking for a figure who has experience in the welding of medium and large single pieces or has the ambition to be able to weld them. The applicant could also be novice, but needs a basic technical drawing skills and the will to be a welder. We perform MIG, MAG and submerged arc welding.

SKILLS REQUIRED

- Good knowledge of technical drawing (essential);
- Knowledge of welding parameters;
- Ability to handle workpieces with an overhead crane;
- Forklift certificate (preferred);
- Overhead crane certificate (preferred);
- State-Regions Agreement (preferred);

WHAT WE OFFER

Type of contract: permanent contract for metalmechanical industry (passing for a fixed-term contract for 6 months)

Working day: Per day, except when dealing with a job on the submerged arc, in which case two or three work shifts.

Remuneration: according to experience level (zero experience, apprentice - full autonomy RAL 38k€ and higher depending on knowledge and seniority).

If you are a young who is passionate about the welding, you will begin your training at ISMEC, obtaining your first results after just a few months.
